

AMPHONIL CF+

Chemical name : Cocamidopropyl Betaine

FEATURES

Amphonil CF+ is a mild detergent which can be used as primary or secondary surfactant. This product is foam booster and viscosity enhancer and can be mixed with anionic, cationic and nonionic surfactants. Its particular features are:

- 1.Low amount of MCA & DCA (lower than standard limits).
- 2.Low salt amount and dry residue.
- 3.Proper color without bleaching.

Applications

Hair conditioners, bath cleansers, shampoos, creams and lotions, bath gel, hand washing liquid, dishwashing liquid.

Storage and stability

In sealed original containers and at temperatures between 5 and 40 °C AMPHONIL CF+ remain stable for at least one year.

Physicochemical properties

Appearance (25 °C)	Light yellow liquid
Active matter (MW=358)	28-32 %
pH	4.5-5.5
Salt	6 % Max
Solid content	38 % Max
MCA (ppm)	5 Max
DCA (ppm)	10 Max
Free Amidoamine (potentiometric method)	1.5 % Max
